SLAMLIN

A point-trick duel for two with handicap offers, hidden second cards, and a three-card lay-off

Designed by Jonathan Ratschat

60–90 minutes • Version 4.3 • 23 October 2026

Concept

Slamlin is a point-trick game for two. Players compete to become the **Declarer**, who names the **game type**: a Trump, No-trump, or Nullo game.

Instead of bidding points, you offer a harder **target** or **handicaps**. Handicaps give your opponent an edge, such as a pick from the talon or a power to use in the tricks. Targets and handicaps are worth **levels**. The more levels you offer, the more the contract is worth, and the more your opponent scores if you fail it. While the cards arrive, the higher offer earns a bonus. If you stay ahead, though, your opponent can pass and leave you to declare. If you win the auction, your opponent becomes the **Defender** and uses your handicaps against you.

All 32 cards are in play. Once the talon and reserve are taken, you know exactly which cards your opponent holds. Two things stay hidden. Before the first trick, both players set aside three cards face down as a **lay-off** for the last three tricks. In the first six tricks, the **double tricks**, both players place their second card face down at the same time. Choosing the lay-off takes careful planning. Since you know each other's cards, the second cards turn into bluffing and second-guessing.

Both players score card points, so the Defender plays for points too. If the Defender, or in Nullo the Declarer, captures no more card points than the target allows, the Declarer makes the contract and scores its value. Otherwise, the Defender scores it, and the levels count double.

After six deals, the player with the higher score wins. For your first match, see **First Match**.

Setup

Players: 2.

Cards: 32 cards: 7, 8, 9, 10, J, Q, K, and A in each of the four suits.

Components: 6 handicap tokens (Call the Shots, Second Pick, Double Pick, Sorry Not Sorry, Fair Share, Most Wanted) and 4 target tokens (a Schneider and a Schwarz for each player). For the Tour and Stage Match, also 2 vulnerability markers. The last pages have them as cards, plus a game board.

Scoring: A score sheet, or poker chips. With chips, put them in the middle as a bank. Each player takes their points from it and keeps them in their score stack.

Dealer: Randomly choose the dealer for the first deal. After that, players take turns dealing.

Board: Optional. The first dealer is A. Coins mark the deal, the offer totals, the game type, and the stage points.

Deal: Deal **10 cards** to each player. Place **2 cards** in the middle as the **talon**, one face up and one face down, and **2 cards** face down beside it as the **reserve**. The last **8 cards** form the **stock**. Shuffle the six handicap tokens and lay them face down in a **row**. Each player takes their own Schneider and Schwarz.

Match: A match is **6 deals**, so each player deals three times.

First Match

Your first match teaches the game in three steps. In deals 1 to 3, leave out **Nullo** and the **Schwarz** tokens.

Deals 1 and 2 skip the auction and the handicap tokens. Deal the 8 stock cards right away, 4 to each player, so both players have 14 cards. The non-dealer either takes the contract or passes. If they pass, the dealer may take it. If both pass, the same dealer shuffles and deals again, and this redeal does not count as a deal. Whoever takes the contract is the Declarer and plays Simple. Before the talon step, they may add their own Schneider. Then play the deal as usual.

Deal 3 is your first auction. Do not shuffle the handicap tokens. Instead, the dealer turns up Call the Shots and Second Pick at 10 cards, Sorry Not Sorry and Fair Share at 12 cards, and Most Wanted and Double Pick at 14 cards. The cheaper handicaps then come first.

From deal 4 on, play the full game.

A Deal at a Glance

Each deal follows these steps. The sections below explain each one.

1. **Deal:** 10 cards each. Talon: 1 face up, 1 face down. Reserve: 2 face down. Stock: 8 cards. Handicap tokens face down in a row.
2. **Offer rounds (10 and 12 cards):** Turn up the next two tokens. Lower total first. Add one token or skip. Higher total scores 3. Then 2 more cards each.
3. **Final round (14 cards):** Turn up the last two tokens. Lower total first, then alternate. Add tokens until your total is higher than your opponent's, or pass. A pass ends the auction, and the other player becomes the Declarer.
4. **Contract:** The Declarer may still add tokens, then gives their visible handicap tokens to the Defender.
5. **Talon:** As the talon handicap says, or First Pick without one. The Declarer names the game type: a trump suit, No-trump, or Nullo.
6. **Reserve:** One card each. Skip with Double Pick.
7. **Lay-off:** Both set aside 3 cards face down at the same time.
8. **Double tricks (1–6):** Lead, follow, then both second cards face down and revealed together. The Defender leads trick 1.
9. **Single tricks (7–10):** One card each. Trick 7: your last card in hand. Then take the lay-off into your hand. Last trick: +2.
10. **Scoring:** Card points first. Then the target decides. Made: the Declarer scores 12 + 3 per level. Failed: the Defender scores 12 + 6 per level.

Game Types

After the auction, the Declarer names one of three game types (see **Talon**).

Trump game: The Declarer names one suit as **trump**. Any trump beats every card of the other suits. In the trump suit, the Jack and the Nine rank highest and are worth 4 and 3 card points. A trump game has 33 card points.

No-trump: There is no trump suit. The highest card of the led suit wins each trick. All Jacks and Nines are worth 0. No-trump has 26 card points.

Nullo: Played like No-trump, but the goal is reversed. The Declarer wants to capture as few card points as possible, and in scoring, each player scores the card points in their opponent's pile. Nullo has 26 card points.

Cards

Rank in the trump suit: J > 9 > A > 10 > K > Q > 8 > 7.

Rank in all other suits, and in every suit in No-trump and Nullo: A > 10 > K > Q > J > 9 > 8 > 7.

Card points are the same in every game type, except that the Jack and Nine of trump only count in a trump game. All other Jacks and Nines are worth 0. Table 1 lists all card points.

Table 1: Card points

Card	Points
Jack of trump	4
Nine of trump	3
Ace	2
Ten	2
King	1
Queen	1
All other cards	0
Last trick	2
Sum in a trump game	33
Sum in No-trump and Nullo	26

Contract

The Declarer plays a **contract**: a target and any handicaps. Its **total** is the sum of their levels, from 0 to 16, and decides its value. Only the target decides whether the contract is made.

Targets. The target is what the Declarer must achieve to make the contract. It limits the card points of one player:

- In a trump game and in No-trump, it limits the **Defender**. The Declarer wants the Defender to capture as few card points as possible.
- In Nullo, it limits the **Declarer**. The Declarer wants to capture as few card points as possible themselves.

Table 2 shows the most card points the limited player may capture. In a trump game and in No-trump, the Declarer therefore needs the rest. With Simple in a trump game, that is at least 19 of the 33 card points. If the limited player captures no more, the contract is **made**. If they capture even one card point more, the contract **fails**.

Captured card points are all card points in a player's pile after the last trick, including the 2 for the last trick and cards placed there by Fair Share. In Nullo, the target counts the Declarer's own pile, before the swap in scoring.

Table 2: Targets

Target	Levels	Trump Defender	No-trump Defender	Nullo Declarer
Simple	0	14	11	11
Schneider	4	9	7	7
Schwarz	8	4	3	3

Example: In a trump game with Simple, the Defender may capture at most 14 of the 33 card points. With 14 or fewer, the contract is made. With 15 or more, it fails. In Nullo with Schneider, the Declarer may capture at most 7 of the 26 card points.

Target tokens. Simple needs no token. Each player has their own Schneider and Schwarz token, so both players can offer the same target.

Handicaps. Handicaps give the Defender an edge. There are six, each a token, listed in Table 3. Call the Shots takes effect automatically. Second Pick and Double Pick change the talon step. The other three are **powers**. The Defender may use each power once, in a trick of their choice, and then flip its token.

Auction

The cards arrive in three steps, and the players build their offers in between. The player who does not pass in the final round becomes the **Declarer**. The other player is the **Defender**.

Offer. Your offer is the tokens in front of you: handicap tokens taken from the row, and your own target tokens. Its total is the sum of the levels you can see. With no tokens, you offer Simple for a total of 0. An offer can only grow, and every token you add must raise its total.

Laying over. If you add Schwarz while you have Schneider, lay it over Schneider. In the same way, lay Double Pick over Second Pick. The covered token no longer counts, but it stays in your offer. You cannot add Schneider once you have Schwarz, or Second Pick once you have Double Pick.

Row. At the start of each round, the dealer turns up the next two tokens of the row: the first two at 10 cards, the next two at 12 cards, and the last two at 14 cards. A face-up token stays available until a player takes it.

Offer rounds. After 10 cards and again after 12 cards, play an offer round. The player with the lower total at the start of the round acts first, or the non-dealer if the totals are tied. Each player gets one turn. On your turn, add one token to your offer or skip. The token can be a face-up handicap token or one of your own target tokens. After both turns, the player with the higher total scores an **offer bonus** of **3**. If the totals are tied, no one scores it. Then the dealer deals 2 more cards to each player from the stock.

Final round. At 14 cards, play the final round. The player with the lower total acts first, or the non-dealer if the totals are tied. Then the players alternate. On your turn, either raise or pass. To raise, add tokens one at a time until your total is higher than your opponent's, and stop as soon as it is. If you cannot get higher, you must pass.

In the final round, a pass ends the auction. The other player becomes the Declarer, and their offer is the contract. If both totals are 0, that player may decline to be the

Table 3: Handicaps

Handicap	Levels	Effect
Automatic		
Call the Shots	1	Before trick 7 and again before trick 8, the Defender decides who leads it.
Talon		
Second Pick	1	The Declarer names the game type first. Then the Defender picks one talon card, without looking at the face-down card. The Declarer gets the other.
Double Pick	2	The Declarer names the game type first. Then the Defender turns up the face-down talon card and picks any two of the four talon and reserve cards. The reserve cards stay face down. The Declarer gets the other two. Skip the Reserve step.
Powers: used once, then the token is flipped		
Sorry Not Sorry	1	When playing any card but the first of a trick, the Defender may break suit even though they could follow. They announce it once the card is face up. The card cannot win the trick, even as a trump.
Fair Share	2	Once all cards of a trick are face up and before it is taken, each player puts their own cards from the trick on their own pile. The winner still leads next and still scores 2 if it is the last trick.
Most Wanted	2	After the Defender leads, or before the second cards of a double trick, the Defender names a card. If the Declarer holds it in hand and may legally play it now, the Declarer must play it face up. As a second card, it comes before the Defender's. Otherwise nothing happens, and the power is used.

Declarer. Then all tokens go back, and the same dealer shuffles and deals again. This redeal does not count as one of the six deals.

After the auction. The Declarer may still add tokens: their own target tokens or face-up handicap tokens from the row. Then they give their visible handicap tokens to the Defender. The tokens in the Defender's offer, any covered token, and any token left in the row are set aside for this deal. The game type stays secret until the talon step.

Example: A deals. At 10 cards, Fair Share and Call the Shots are turned up. B acts first and takes Call the Shots (total 1). A takes Fair Share (2). A has the higher total and scores 3. At 12 cards, Second Pick and Most Wanted are turned up. B has the lower total, acts first, and takes Most Wanted (3). A takes Second Pick (3). The totals are tied, so no one scores. At 14 cards, Sorry Not Sorry and Double Pick are turned up. The totals are still tied, so B acts first as the non-dealer and adds Schneider (7). A passes. B is the Declarer with Schneider, Call the Shots, and Most Wanted, a total of 7. B gives Call the Shots and Most Wanted to A, and A's tokens are set aside.

Talon

The talon handicap in the contract decides who picks the talon cards. All talon cards go into the players' hands. No one looks at the face-down talon card before taking it, unless Double Pick turns it up.

First Pick: Without a talon handicap, the Declarer picks one talon card. The Defender gets the other. Then the Declarer names the game type.

Second Pick and Double Pick: The Declarer names the game type first. Then the Defender picks, as Table 3 describes.

Reserve

With Double Pick, the reserve cards are already shared. Otherwise, deal one reserve card to each player. Both players now have **16 cards**.

Lay-off

Both players choose **3 cards** from their hand and set them aside face down at the same time. These cards are played in the last three tricks. Each player keeps 13 cards in hand. You may look at your own lay-off at any time.

Play

Following suit: The first card of a trick sets the **led suit**. Every other card played to that trick, including the leader's own second card, must be of the led suit if the player can. Otherwise, any card may be played.

Winning a trick: The highest trump wins. If no trump was played, the highest card of the led suit wins. The winner puts the trick face down on their own pile and leads the next one. No one may look at captured tricks before scoring.

A deal has **10 tricks**: first six **double tricks**, then four **single tricks**. The Defender leads the first trick.

Double tricks (1–6). Each player plays two cards:

1. The leader plays a card face up.
2. The follower plays a card face up.
3. Both players place a second card face down at the same time, then reveal them.

Example: Hearts are trump. B leads the King of Spades, and A follows with the Seven of Spades. B still has Spades, so B's second card must be a Spade. B places the Ace. A has no Spades left and places the Seven of Hearts. Both reveal, and A's trump wins the trick.

Single tricks (7–10). Each player plays one card, leader first. In trick 7, both play their last card in hand. Then both take their lay-off into their hand for tricks 8–10. The winner of the **last trick** scores 2 points for it.

Revoke: Breaking suit although you could follow, without Sorry Not Sorry, is a **revoke**. If the Declarer revokes, the contract fails. If the Defender revokes, it is made.

Scoring

Offer bonuses are scored during the auction. At the end of each deal, score in this order:

1. Card points. Both players score the card points they captured. In **Nullo**, swap: each player scores the card points in their opponent's pile.

Tip: Count only the smaller pile, plus 2 if that player won

the last trick, and subtract it from 33 in a trump game, or from 26 in No-trump and Nullo.

2. Contract value. Check the target first. If the Defender, or in Nullo the Declarer, captured no more card points than the target allows, the contract is made. Otherwise it fails. If it is made, the Declarer scores the contract's value, **12 + 3 per level**. If it fails, the Defender scores **12 + 6 per level**, so the levels count double. Table 4 lists all values.

Table 4: Contract values

Levels	0	1	2	3	4	5	6	7	8
Made	12	15	18	21	24	27	30	33	36
Failed	12	18	24	30	36	42	48	54	60
Levels	9	10	11	12	13	14	15	16	
Made	39	42	45	48	51	54	57	60	
Failed	66	72	78	84	90	96	102	108	

Game End

After six deals, the player with the higher score wins. If the scores are tied, the match is a draw.

This is the most straightforward scoring and the best one for your first matches. The Stage Match and the Tour Match add a race that makes the right offer depend on the score. The Stage Match fits into the same six deals, and the Tour Match makes for a longer session.

Variants

Optional rules

The game above is complete without these rules. Open Endgame works with any match. The Tour Match and the Stage Match each replace the standard match, so choose one of them or neither.

Open Endgame

By trick 8, a player who counts cards knows the opponent's last three cards exactly. To even this out between players who count and players who do not, both players turn their lay-off face up when they take it into their hand after trick 7. If the result of the last three tricks is then obvious, players may agree on it instead of playing them out.

Tour Match

In the Tour Match, made contracts also count toward a race. The first player whose made contracts add up to **40** wins a **stage**, and the first to win two stages wins a **tour** and a large bonus. A player who has won a stage in the tour pays more for a failed contract.

The Tour Match follows Rubber Bridge. A stage is a game in bridge, and a tour is a rubber.

The race makes the right offer depend on the score, not only on your hand. A small contract can be enough to finish a stage. Failed contracts earn no stage points. So offering a contract you will probably fail can still pay off if it beats the offer of an opponent who is close to winning a stage. A player without a stage pays less, so they can offer more boldly. This gives the trailing player a way back.

Play one or more tours instead of six deals. Players keep taking turns dealing across tours, and everything else stays the same.

Stage points: When the Declarer makes a contract, its value also counts as **stage points** for them. Card points, failed contracts, and bonuses never count as stage points.

Winning a stage: The first player to reach **40** or more stage points wins a stage. Both players' stage points then reset to zero. A contract of 10 or more levels is worth at least 42, so making it wins a stage on its own.

Vulnerability: A player who has won a stage in the current tour is **vulnerable** and keeps a vulnerability marker until the tour ends. If a vulnerable Declarer fails a contract, the Defender scores **12 + 9 per level**. Table 5 lists all values.

Table 5: Contract values with vulnerability

Levels	0	1	2	3	4	5	6	7	8
Made	12	15	18	21	24	27	30	33	36
Failed	12	18	24	30	36	42	48	54	60
Failed, vulnerable	12	21	30	39	48	57	66	75	84
Levels	9	10	11	12	13	14	15	16	
Made	39	42	45	48	51	54	57	60	
Failed	66	72	78	84	90	96	102	108	
Failed, vulnerable	93	102	111	120	129	138	147	156	

Winning a tour: The first player to win two stages wins the tour and scores a bonus of **100**. If the opponent has also won a stage in this tour, the bonus is **70**. Then a new tour begins, in which no one is vulnerable yet.

Ending the session: Agree before you start how many tours to play, or stop after any finished tour. The higher score wins. If the scores are tied, the session is a draw.

Unfinished tour: If you have to stop during a tour, each player who has won a stage in it scores **40**. If no stage has been won in it, nothing more is scored.

Keeping score: Card points, contract values, and bonuses all count toward each player's score. Stage points only decide stages, so they are not scored a second time.

On a score sheet, each player has one column. Write each result on its own line: first any offer bonuses, then the card points, then any contract value. Circle the value of each made contract, since it is also the Declarer's stage points. Do not circle card points, failed contracts, or bonuses. When a stage is won, draw a line across both columns. Only circled points below the last line count toward the current stage.

With chips, put chips from made contracts in a separate stage stack. When a stage is won, both players move their stage stack to their score stack.

Example: A and B play one tour. Table 6 shows their score sheet, without offer bonuses.

Stage Match

In the Stage Match, made contracts also count toward a race. The first player whose made contracts add up to **40** wins a **stage** and a bonus, and both players start again from zero. There are no tours, and the match lasts six deals as usual.

The Stage Match follows Chicago, a short form of Bridge. A stage is a game in Bridge.

Vulnerability follows a fixed schedule, so both players know in advance when the stakes rise. A vulnerable player pays more for a failed contract, but also earns a bigger bonus for winning a stage. Stage points left after the sixth deal score nothing, so late in the match a stage is only worth chasing if it can still be finished.

Table 6: Score sheet of the example tour

Deal	What happens	A	B
1	A declares Hearts: Schneider, Second Pick, Call the Shots (6 levels, worth 30). B captures 8, so A makes it.	25 (30)	8
2	B declares No-trump: Simple, Second Pick, Sorry Not Sorry (2 levels, worth 18). A captures 10, so B makes it.	10	16 (18)
3	A declares Spades: Simple, Second Pick, Most Wanted, Call the Shots (4 levels, worth 24). B captures 12, so A makes it. A's circled points reach 30 + 24 = 54, so A wins a stage and is now vulnerable. B's 18 no longer count.	21 (24)	12
4	B declares Clubs: Schneider, Second Pick, Fair Share (7 levels). A captures 11, so B fails. B is not vulnerable, so A scores 12 + 6 × 7 = 54.	11 54	22
5	A declares Nullo: Simple, Second Pick, Call the Shots, Sorry Not Sorry (3 levels). A captures 14, so A fails. In Nullo, each player scores the other's pile. A is vulnerable, so B scores 12 + 9 × 3 = 39.	12	14 39
6	A declares Diamonds: Simple, Second Pick, Call the Shots (2 levels, worth 18). B captures 12, so A makes it.	21 (18)	12
7	A declares Hearts: Simple, Second Pick, Most Wanted, Call the Shots (4 levels, worth 24). B captures 13, so A makes it. A's circled points reach 18 + 24 = 42, so A wins a second stage and the tour.	20 (24)	13
Bonus	B has not won a stage in this tour, so A scores 100.	100	
Score	They end the session after this tour. A wins.	370	154

Stage points: When the Declarer makes a contract, its value also counts as **stage points** for them. Card points, failed contracts, and bonuses never count as stage points.

Winning a stage: The first player to reach **40** or more stage points wins a stage and scores a bonus of **40** right away, or **70** if they are vulnerable in that deal. Both players' stage points then reset to zero. A contract of 10 or more levels is worth at least 42, so making it wins a stage on its own.

Vulnerability: Vulnerability depends only on the deal number, as shown in Table 7. Place the vulnerability markers at the start of each deal. If a vulnerable Declarer fails a contract, the Defender scores **12 + 9 per level**, as listed in Table 5.

Table 7: Vulnerability in the Stage Match

Deals	Vulnerable
1–2	No one
3–4	The dealer
5–6	Both players

Match end: After six deals, the higher score wins. Stage points left over score nothing. If the scores are tied, the match is a draw.

Keeping score: Card points, contract values, and bonuses all count toward each player's score. Stage points only decide stages, so they are not scored a second time.

On a score sheet, each player has one column. Write each result on its own line: first any offer bonuses, then the card points, then any contract value. Circle the value of each made contract, since it is also the Declarer's stage points. Do not circle card points, failed contracts, or bonuses. When a stage is won, draw a line across both columns and write the stage bonus on its own line below it. Only circled points below the last line count toward the current stage.

With chips, put chips from made contracts in a separate stage stack. When a stage is won, both players move their stage stack to their score stack.

Design Notes and Credits

Slamlin is mainly inspired by Sid Sackson's Slam!, with additional inspiration from Skat, Belote, Ely Culbertson's Jo-Jotte, Jonathan Kandell's Ultimo, Urs Hostettler's Cosmic Eidex, Matthew LaBrake's Solar Eclipse, and Bridge.

Special thanks to all playtesters and everyone who helped improve Slamlin, especially Tanja Simic, Matthias Gilch, Bryce Carter, and Markus Roßkopf.

I also want to thank Jonathan Kandell, whose content on BoardGameGeek was a big inspiration. I don't think the game would exist without it.

SLAMLIN Player Reference

Version 4.3

A Deal at a Glance

1. **Deal:** 10 cards each. Talon: 1 face up, 1 face down. Reserve: 2 face down. Stock: 8 cards. Handicap tokens face down in a row.
2. **Offer rounds (10 and 12 cards):** Turn up the next two tokens. Lower total first. Add one token or skip. Higher total scores 3. Then 2 more cards each.
3. **Final round (14 cards):** Turn up the last two tokens. Lower total first, then alternate. Add tokens until your total is higher than your opponent's, or pass. A pass ends the auction, and the other player becomes the Declarer.
4. **Contract:** The Declarer may still add tokens, then gives their visible handicap tokens to the Defender.
5. **Talon:** As the talon handicap says, or First Pick without one. The Declarer names the game type: a trump suit, No-trump, or Nullo.
6. **Reserve:** One card each. Skip with Double Pick.
7. **Lay-off:** Both set aside 3 cards face down at the same time.
8. **Double tricks (1–6):** Lead, follow, then both second cards face down and revealed together. The Defender leads trick 1.
9. **Single tricks (7–10):** One card each. Trick 7: your last card in hand. Then take the lay-off into your hand. Last trick: +2.
10. **Scoring:** Card points first. Then the target decides. Made: the Declarer scores 12 + 3 per level. Failed: the Defender scores 12 + 6 per level.

Cards

Trump: J > 9 > A > 10 > K > Q > 8 > 7.
Other suits, No-trump, Nullo: A > 10 > K > Q > J > 9 > 8 > 7.
Game types: Trump game: one suit is trump. No-trump: no trump suit. Nullo: no trump suit, the Declarer wants few card points, and each player scores the opponent's pile.
Follow suit if you can, including with the leader's own second card. Highest trump wins, otherwise highest card of the led suit.

Card	Points
Jack of trump	4
Nine of trump	3
Ace	2
Ten	2
King	1
Queen	1
All other cards	0
Last trick	2
Sum in a trump game	33
Sum in No-trump and Nullo	26

Scoring

1. Card points: Each player scores what they captured. In Nullo, each scores the opponent's pile.

2. Contract value: 12 + 3 per level of its total. Made: the Declarer scores it. Failed: the Defender scores **12 + 6 per level**.

Levels	0	1	2	3	4	5	6	7	8
Made	12	15	18	21	24	27	30	33	36
Failed	12	18	24	30	36	42	48	54	60

Levels	9	10	11	12	13	14	15	16
Made	39	42	45	48	51	54	57	60
Failed	66	72	78	84	90	96	102	108

Match: 6 deals. The higher score wins. If the scores are tied, the match is a draw.

Targets

Most card points the listed player may capture. One card point more and the contract fails. Simple needs no token. Schwarz is laid over Schneider if you have it.

Target	Levels	Trump Defender	No-trump Defender	Nullo Declarer
Simple	0	14	11	11
Schneider	4	9	7	7
Schwarz	8	4	3	3

Auction

Offer: the tokens in front of you. Its total is the sum of the levels you can see. Every token you add must raise it. Double Pick is laid over Second Pick if you have it. A covered token no longer counts.

Row: face down. Turn up two tokens at 10 cards, two more at 12, the last two at 14.

Offer bonus: after both turns of an offer round, the higher total scores 3. On a tie, no one scores.

After the auction: the Declarer may still add tokens, then gives the visible handicap tokens to the Defender. All other tokens are set aside.

Handicaps

The Defender may use each power once, then flips its token.

Handicap	Levels	Effect
Automatic		
Call the Shots	1	Before trick 7 and again before trick 8, the Defender decides who leads it.
Talon		
Second Pick	1	The Declarer names the game type first. Then the Defender picks one talon card, without looking at the face-down card. The Declarer gets the other.
Double Pick	2	The Declarer names the game type first. Then the Defender turns up the face-down talon card and picks any two of the four talon and reserve cards. The reserve cards stay face down. The Declarer gets the other two. Skip the Reserve step.
Powers: used once, then the token is flipped		
Sorry Not Sorry	1	When playing any card but the first of a trick, the Defender may break suit even though they could follow. They announce it once the card is face up. The card cannot win the trick, even as a trump.
Fair Share	2	Once all cards of a trick are face up and before it is taken, each player puts their own cards from the trick on their own pile. The winner still leads next and still scores 2 if it is the last trick.
Most Wanted	2	After the Defender leads, or before the second cards of a double trick, the Defender names a card. If the Declarer holds it in hand and may legally play it now, the Declarer must play it face up. As a second card, it comes before the Defender's. Otherwise nothing happens, and the power is used.

Variants Reference

Version 4.3

Open Endgame

Both players turn their lay-off face up when they take it into their hand after trick 7. If the result of the last three tricks is then obvious, players may agree on it.

Tour Match

Play one or more tours. Made contracts earn stage points, 40 win a stage, and two stages win a tour. Players keep taking turns dealing.

Stage points: The value of a made contract also counts as stage points for the Declarer. Card points, failed contracts, and bonuses never do.

Stage: The first to reach **40** or more stage points wins a stage. Both players' stage points then reset to zero. Making a contract of 10 or more levels wins a stage on its own.

Vulnerable: A player who has won a stage in the current tour. If a vulnerable Declarer fails, the Defender scores **12 + 9 per level**.

Tour: The first to win two stages wins the tour and scores **100**, or **70** if the opponent has also won a stage. A new tour begins, and no one is vulnerable.

Session end: Play the agreed number of tours, or stop after any finished tour. The higher score wins. If the scores are tied, the session is a draw.

Unfinished tour: Each player who has won a stage in it scores **40**. Otherwise nothing more is scored.

Keeping Score

All points count toward the score. Stage points are not scored a second time.

Score sheet: One column per player, one result per line: any offer bonuses, card points, then any contract value. Circle made contract values only. When a stage is won, draw a line across both columns. Only circled points below the last line count toward the current stage.

Chips: Put chips from made contracts in a separate stage stack. When a stage is won, both players move their stage stack to their score stack.

Contract Values

Made: the Declarer scores 12 + 3 per level. Failed: the Defender scores 12 + 6 per level, or 12 + 9 per level if the Declarer is vulnerable.

Levels	0	1	2	3	4	5	6	7	8
Made	12	15	18	21	24	27	30	33	36
Failed	12	18	24	30	36	42	48	54	60
Failed, vulnerable	12	21	30	39	48	57	66	75	84

Levels	9	10	11	12	13	14	15	16
Made	39	42	45	48	51	54	57	60
Failed	66	72	78	84	90	96	102	108
Failed, vulnerable	93	102	111	120	129	138	147	156

Stage Match

Six deals with stages, but no tours. The value of a made contract also counts as stage points for the Declarer. The first to reach **40** or more wins a stage, and both players' stage points reset to zero. Vulnerability follows the schedule.

Deals	Vulnerable
1–2	No one
3–4	The dealer
5–6	Both players

Stage bonus: 40 right away, or 70 if vulnerable in that deal. Write it on its own line, below the line that ends the stage.

Match end: The higher score after six deals wins. Leftover stage points score nothing. If the scores are tied, the match is a draw.

SLAMLIN

Game Board

Version 4.3

A is the dealer of the first deal. During the auction, each player marks their offer total with a coin. After it, one coin marks the contract, and one marks the game type once it is named. In the Tour and Stage Match, each player marks their own stage points.

Deals

Deal	1	2	3	4	5	6
Dealer	A	B	A	B	A	B
Stage vul.			A	B	Both	Both

Auction

Offer bonus at 10 and 12 cards: higher total scores 3.

10 cards	12 cards	14 cards
Turn up tokens 1 and 2	Turn up tokens 3 and 4	Turn up tokens 5 and 6
Offer round: add or skip	Offer round: add or skip	Final round: raise or pass

First Pick 0

NO TALON TOKEN

The Declarer picks one talon card, without looking at the face-down card. The Defender gets the other. Then the Declarer names the game type.

Game Type

♣ Clubs 33 points	♢ Diamonds 33 points	♡ Hearts 33 points
♠ Spades 33 points	No-trump 26 points	Nullo 26, piles swapped

Rank and Card Points

Highest first. Last trick: 2 points.

Trump The named suit	J 4	9 3	A 2	10 2	K 1	Q 1	8 0	7 0
Other suits Also No-trump, Nullo	A 2	10 2	K 1	Q 1	J 0	9 0	8 0	7 0

Simple 0

NO TARGET TOKEN. Most card points the limited player may capture:

Trump	Defender	14
No-trump	Defender	11
Nullo	Declarer	11

Offer and Contract Total

Auction: one coin per player. After it: one coin for the contract.

Total	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16

SLAMLiN

Token Cards (1 of 2)

Print at actual size on A4 or US Letter and check the 50 mm bar. Cut along the crop marks into 57 × 89 mm cards that fit standard card sleeves. Use card stock, or slip each card in front of an old playing card in its sleeve.

Version 4.3

50 mm

Call the Shots 1

Automatic

WHEN
Before tricks 7 and 8

The Defender decides who leads the trick.

Call the Shots 1

Second Pick 1

Talon — Double Pick covers it

WHEN
Talon step

The Declarer names the game type first. Then the Defender picks one talon card, without looking at the face-down card. The Declarer gets the other.

Second Pick 1

Double Pick 2

Talon — Over Second Pick if any

WHEN
Talon step

The Declarer names the game type first. Then the Defender turns up the face-down talon card and picks any two of the four talon and reserve cards. The reserve cards stay face down. The Declarer gets the other two. Skip the Reserve step.

Double Pick 2

Sorry Not Sorry 1

Power — Use once, then flip

WHEN
Playing any card but the first of a trick

The Defender may break suit even though they could follow. They announce it once the card is face up. The card cannot win the trick, even as a trump.

Sorry Not Sorry 1

Fair Share 2

Power — Use once, then flip

WHEN
Once all cards of a trick are face up, before it is taken

Each player puts their own cards from the trick on their own pile. The winner still leads next and still scores 2 if it is the last trick.

Fair Share 2

Most Wanted 2

Power — Use once, then flip

WHEN
After the Defender leads, or before the second cards of a double trick

The Defender names a card. If the Declarer holds it in hand and may legally play it now, the Declarer must play it face up. As a second card, it comes before the Defender's. Otherwise nothing happens, and the power is used.

Most Wanted 2
